

infection prevention control week

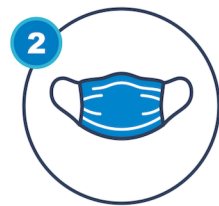

PPE USED CORRECTLY PROTECTS YOU AND THE PATIENT.

PPE* is a routine part of infection prevention and control measures for **standard and transmission-based precautions** to prevent the spread of infections.

Hand hygiene should be performed **BEFORE** putting on PPE and **AFTER** removing each item of PPE to prevent hands from becoming contaminated.

PUT ON PPE IN THIS ORDER

Perform hand hygiene first.

REMOVE PPE IN THIS ORDER

Perform hand hygiene after removing gloves.

* PPE = PERSONAL PROTECTIVE EQUIPMENT
